Continuation Of PTO-462, Box 10

Appellant's notice of Appeal has been noted and entered.

The appeal brief presented March 9th, 2007 for Application number 10/086014 is non-complaint with 37 CFR 41.37 for the following reasons:

- (1) Sections (viii) through (x) of the Appellant's brief lack section title enumeration.
- (2) Section entitled Appendix A is located presently between sections (viii) and (ix) this is contradiction to 37 CFR 41.37(c)(1) for failing to maintain the order and numbering of brief sections as set forth. While the Appellant may include further section, such sections should be appended to the brief after the presentation of sections (i) through (x).
- (3) The brief contains sections including at least (iv), (ix) and (x) wherein the Appellant has indicated there is no attached amendments/evidence/related proceedings this is improper and the Appellant should indicate "None" in place of these statements (MPEP 1205.02).
- (4) Section (v) of the brief entitled summary of claimed subject matter is not restricted to the claimed invention and includes references to the state of the art and a general discussion of the disclosed apparatus rather than the claimed invention. This section is therefore is improper for failing to concisely correlate the —claimed- subject matter to the specification as presented.
- (5) Section (iii) includes the identification of claims as pending. The "pending" status is not a listed identifier as set forth by 37 CFR 41.37 or MPEP section 1205.02.
- (6) Section (vii) titled Arguments, includes five enumerated sections with the fifth section clearly directed to the second grounds of rejection appealed (through the sections respective title)

however, the remaining four sections fail to clearly identify the ground of rejection to which they refer to. The Appellant is required to treat each grounds of appeal under a separate heading in their arguments section. Presently no section identifies the first grounds of rejection under appeal and therefore is improper (MPEP 1205.02).
